

**SOLARIS**  
QUALITY ATTACHMENTS

# EARTH DRILL SERIES 2

**SUITABLE FOR 0.75 - 3 TON MINI EXCAVATORS**

The Series 2 Earth Drill range is the perfect choice for small excavators between 0.75T-3T, and even though they are the smallest planetary drive in our line up they are highly engineered and built to last.

**HIGH QUALITY HYDRAULIC MOTORS**

Solaris-Auger Torque's huge buying power means we work closely with high quality suppliers to develop the most reliable attachments available on the market today.

**EPICYCLIC GEARBOX**

Torque is amplified by using the unique Solaris-Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

**FORGED HOOD EARS**

Standard with all Earth Drills in areas that we know will take a lot of strain. All hood pins are locked for extra safety making it impossible for the hood to detach from your hitch.

**NON-DISLODGE MENT SHAFT**

Unique to Solaris-Auger Torque, the Non-Dislodgement Shaft is a single piece drive shaft assembled top down and locked into the Earth Drill housing. This design guarantees that the shaft will never fall out, making for a safer work environment, not only for the operator but also any surrounding workers, a **MUST-HAVE FEATURE** for any safety conscious company.
