

Solaris-Black Splitter Hydraulic Log Splitter

- Two piece chromium-steel cone with replaceable tip and double helical thread design with a thread pitch of 24mm for rapid penetration into the hardest of timber
- Unload, position and split hard to process logs within minutes operating a Solaris-Black Splitter attachment from the comfort of the cab.
- Feed quartered logs / stumps into a firewood processor, chipper or tub grinder; no grapple or hard labor needed
- Maintenance-free devices
- Full Manufactures Warranty

The **Solaris-Black Splitter S2, S2X, SG1 & SB** hydraulic wood splitter attachments are designed to fit all models of excavators up to 12 ton, backhoes and skid-steers. The unique rotating threaded cone provides extremely efficient wood-splitting power for various timber types including hard, soft, straight, knotty and twisted.

Turn your mini into a mighty wood splitting machine!
