

HIGH-QUALITY QUICK COUPLERS

MECHANICAL & HYDRAULIC COUPLERS

The world renowned Safelock® dedicated Quick-Hitch System is the ultimate in safety, simplicity, durability, and technical excellence! Designed for excavators in the 0.75 to 9 metric ton range (1,650 – 20,000 lbs.) This quick coupler saves you money by dramatically reducing bucket changeover times. Designed for Safelock® Buckets by Harford Attachments only. Available in Manual or Hydraulic versions.

Another fantastic innovation from Harford Attachments, the Pro-lok® Coupler is a double-locking mechanical coupler designed to pick up most OEM attachments. Rated as best in class, the Pro-lok® features a highly visible safety indicator & automatic wear compensation. Best in class...and built to last! Designed for excavators in the 0.75 to 9 metric ton range (1,650 – 20,000 lbs.)

Uni-lok® Hydraulic Quick Coupler

Utilize the innovative Uni-Lok®, double-locking, hydraulic quick hitch solution with a highly visible safety indicator to ensure safety at every stage. This coupler allows for hands-free operation from inside the cab! Designed for excavators in the 0.75 to 14 metric ton range (1,650 – 20,000 lbs.)
