

## WEDGELOCK QUICK COUPLERS

### MECHANICAL PIN GRABBERS & HYDRAULIC COUPLERS

Wedglock I-Lock Couplers by Cascade provide a host of features for Instant, Independent, and Innovative coupling. Available in both multi-model and OEM-specific models, we offer you the best coupling solution for your excavator. Configurations are available for both 3 and 2-line control circuits depending on machine size. The patented Nexgen configuration allows for instantaneous knuckle reset when an attachment is

The PSM Manual Pin Grabber is a less expensive alternative to Hydraulic Pin Grabbers. Ideal for applications that require less frequent attachments changes. The simple and robust ratchet-driven wedge system allows operators to efficiently change attachments without any hydraulics in the coupler.

Hydraulic Couplers feature Hydraulic Nexgen I-Lock with 2-line control circuit/OEM control circuit or the Hydraulic I-Lock with 3-line control circuit. Hydraulic Tilting is also available without hydraulic cylinders getting in the way. Multi-model attachments pickup and custom solutions for mixed carrier/attachment pickup.
