KRPAN KL2500-TG PTO SKIDDING LOG GRAPPLE

Turn your tractor into a skidder! Attaches directly to the tractor's 3 point hitch.

Equipped with a telescopic arm for maximum reach. Brings the logs in before skidding to keep the center of gravity close to the tractor. Also turns left/ right to give you the widest range of motion, allowing you to pick up logs in a larger area without moving the tractor. Plus, it also helps steer logs around obstacles when driving.
