FARMA SG1000 TRACTOR 3-Pt. LOG GRAPPLE

The FARMA Skidder is an excellent tool for small and medium-sized tractors to haul full trees or lift and move logs.

The skidder is equipped with a hydraulic telescopic arm which allows you to reach the logs and pull them in close to the tractor before skidding, improving your center of gravity and tractor traction. It also comes with a hydraulic motor to rotate the grapple 1 full turn to precisely align the grapple with the log.

As an extra option to the skidder, we offer the FARMA wireless remote-controlled winch. Included with the winch kit is the protective screen for the driver and the tractor.
