

CONE SCREW SPLITTERS

HF-100 MINI CONE SPLITTER

Specifications: HF-100 Mini

Splitter Weight – lbs.....	350
Cone Size-length x base	26 x 12
Max Split Size.....	3' in length
Oil Quantity – gpm	12-20
Oil Pressure – PSI.....	2,100–3,200
Carrier Wt. – lbs.....	1,000–9,000

Don't be fooled by the compact size of the HF-100 Mini Cone Screw Splitter. Its raw splitting power combined with the maneuverability of a mini skid steer are unmatched!

HF-100 Mini - Hands Free Cone Screw Log Splitter For Mini Skid Steer Loaders

To meet the performance demands of larger mini skid loaders that are being produced today, upgrades have been completed to further improve the durability and productivity of the attachment. Engineers increased the main shaft diameter and used a larger carrier bearing group, along with a larger splitting cone. The new splitting cone is now 12" in diameter and 26" long, which increases the splitting capability of the mini skid steer attachment. These new upgrades will allow the HF-100 Mini to keep splitting productively all day, and maintain its legacy of durability, even on the largest mini skid steers.

While it is our smallest cone screw splitter, the HF 100 Mini is not lacking in splitting ability and pure usefulness. The HF-100 is made for mini and lighter duty skid loaders. A smaller equipment carrier size advantage makes it a perfect combination to fit in tight spaces, like narrow paths, or in backyards. Splitting power of the implement is impressive even for its size. Portability and an entry level price are the main reasons customers love the HF-100 Mini cone screw splitter.
